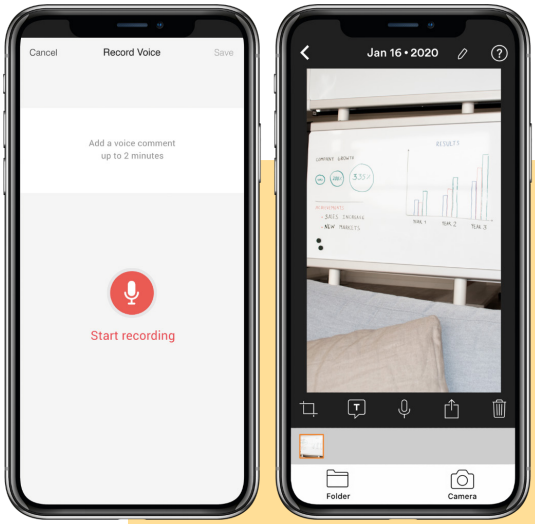
About

Created in 2009, BiBright quickly became one of the most important hubs of Bi-silque's technology solutions. The brand's international presence keeps it attentive to the dynamism of the technological world and its focus on Education brings to the brand a unique stamp of innovation and the ability to introduce solutions on the market that are guided by quality and differentiation.



Blended Learning

The Education sector has changed to deeper technology integration and there is no going back. Many learning and training facilities shifted to a blended learning model. This new approach brings more flexibility and makes it possible to carry out both face-to-face and asynchronous follow-up classes if needed.

Together for a **sustainable future**

As our corporate consciousness evolved, we implemented commitments and initiatives that make us think globally and act locally. We want to make environmentally and socially friendly choices and at the same time keep our human capital and the local community engaged for a greener Earth.

CARBON FOOTPRINT

Use of green energy and waste valorisation are attitudes that changed the way we manage our factory.

CULTURAL DIVERSITY

There are no limits to hiring talent! We are proud of our team's diversity in gender, age, culture, etc.

COMMUNITY ENGAGEMENT

We support local initiatives in the community, hire and source local so we can reduce our carbon footprint.

CERTIFICATIONS

Earth range was the first sustainable product appearing in the Office industry. It was a great motivation for us.

Interactive Flat Panel

Interactive touch screen for collaborative spaces

The Interactive Flat Panel allows the speaker to add digital content to the presentation, including videos and virtual learning resources, such as Apps. The touch interface recognizes your finger, pen, and pointer, guaranteeing a smooth high-resolution experience. Thanks to the whiteboard feature, you can still write and make annotations, draw and organize your ideas. You can make all this in a collaborative way, creating group tasks or choosing to do it in a more traditional way.

WingBoards

Trio boards for interactive flat panels

This clever solution for classrooms makes the writing surfaces available during interactive classes and works as a lockable cabinet to protect the Interactive Flat Panel or LCD as the Teacher leaves the room. The Interactive Panel stays in the front of the class with 4 writing surfaces available while the lesson unfolds. The Wing Boards was designed as a one-size-fits-all solution to otimise the space in front of the class.

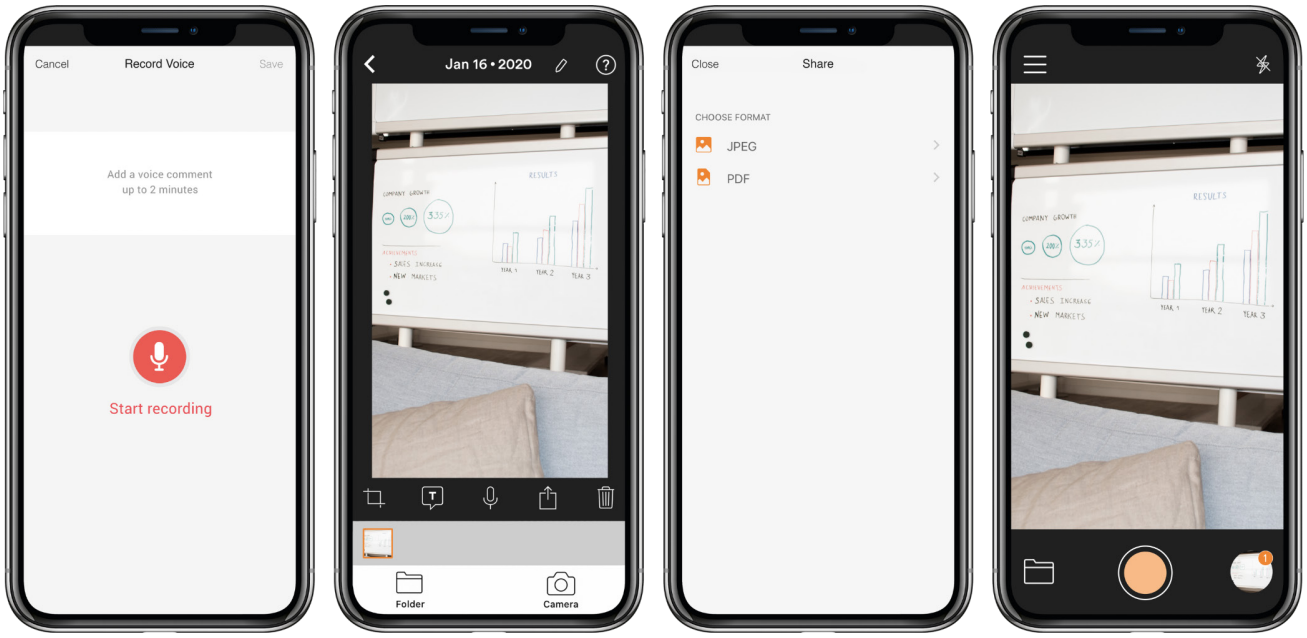
02 SOFTWARE & APPS



HUBING Scan

Capture and share whiteboard content

HUBING Scan was developed to meet the school's needs. Everything you write on a whiteboard surface can be saved, edited, and commented on in written or voice-recorded notes. Capture and organize class exercises solved with students into digital documents that can be complemented with voice and written notes. Download Hubing Scan through Google Play or App Store.

HUBING Notes

Active and collaborative learning

Annotation software was developed for use in interactive whiteboards. This tool allows the creation of content for lessons and collaboration between teacher and student or several students. The simple and intuitive interface has handwriting recognition and mathematical formulas, providing tools from various subjects and different backgrounds. As it is compatible with numerous platforms, it can be used on various devices and operating systems.

Screen Share

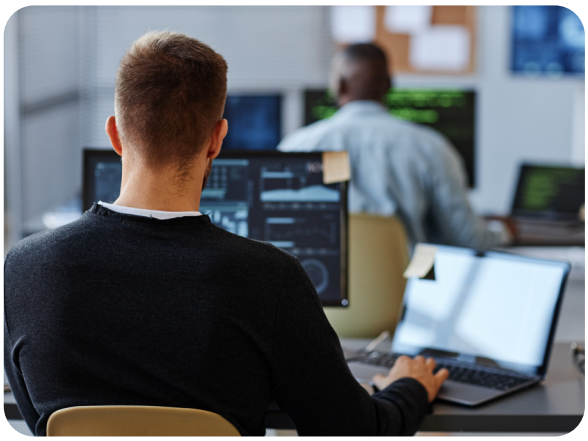
Screen share for an enhanced visual experience

This multi-screen collaborative application makes the content of digital classes available in an enhanced visual experience. Teachers can share the screen on bigger devices or choose to mirror it on each student's screen. It improves the class flow and interactions feel more natural.

Classroom Management

Monitoring and control of student devices

This software for interactive multimedia teaching helps teachers and students in their classroom experience online or remotely. The available tools improve the lesson's effectiveness and encourage students to focus more. The teacher can manage student devices and their use in the classroom and communicate remotely with a student or a group, supervise activities, launch questions, lock screens, control internet usage, and even launch games in the classroom.



Mobile Device Management

Management and remote control of devices

Mobile device management software is an accelerator of the productivity and efficiency of a school's IT staff. Allows control of devices remotely and quick troubleshooting. IT staff can use the software to accelerate productivity and efficiency and decrease problem-solving response time. The diversity of communication and support tools allows you to manage and monitor multiple devices simultaneously, provide remote assistance, view approximate device location, and check inventory.

Digital Whiteboard

A digital canvas with endless possibilities

The digital whiteboard transforms an interactive panel into a canvas where both writing and multimedia content can help teachers make the most out of interactive lessons. There is a built-in media search with images, Gifs, and videos, allowing the user to drag content into the whiteboard presentation. This creates the perfect set-up for endless possibilities of building lessons and adapting them to the group's needs.

Magnetic Whiteboard Eraser

Cleaning small mistakes and tiding up whiteboards

These are the perfect Whiteboard Erasers for those who want to clean their whiteboard quickly and easily. With strong magnets that will hold onto magnetic boards firmly, you don't have to worry about them falling off. The eraser's textile is made of soft absorbent material that won't scratch the surface of the board. The textile part can be replaced in a blink of an eye, and you may even re-use it after a quick wash and dry.

Self Adhesive Notepads

Keep notes visible and reposition them without leaving marks

Self Adhesive Notes are extremely versatile and a great help when you need to remind yourself or others of tasks and leave messages. They also do wonders in brainstorming activities and Agile framework meetings. The sticky paper comes in a variety of colours and is easily repositionable without leaving stains. That's why they can be used on several surfaces such as metal, wood, ceramic, or glass and keep messages noticeable and not easy to be ignored.

06 DISPLAY & NOTICE BOARDS

Enclore Top Hinged Lockable Board

Display information safely in high traffic areas

Enclore Lockable Board was designed for corridors and high-traffic areas. The door opens vertically, which is excellent to prevent injuries to distracted people bumping against it during info updates. The space between the glass and the surface is enough to use with regular magnets and pins. With the lacquered steel surface, the users can use magnets, but it is also writable. The cork surface is resilient making it an excellent display material.The product comes with 2 keys.

Antimicrobial Cork Board

Antimicrobial cork surface to display information

The Antimicrobial Cork Notice Board has been treated with a special additive that inhibits the growth of microbes. As a result, the potential risk of cross-contamination decreases significantly. It's the perfect fit for areas where cleanliness is essential like healthcare facilities, but also for public spaces like meeting rooms or classrooms. Pin boards are a great way to keep important information organised and to post reminders.

Push Pins

The perfect way to post notes and reminders

Accessories are an important part of any noticeboard. The push pins need to be able to hold the paper or material in place without falling out. We decided to create quality push pins to keep the board looking neat and tidy, as well as help to protect the surface and the wall. Available in assorted colors or transparent, our push pins are perfect to be used with cork, felt, or other surfaces that accept pins.

Moderation Cards

Brainstorm and structure information for lessons

Training becomes more effective when ideas and expertise are shared. Group training sessions are designed to encourage play, connection and team building. The use of moderation cards is essential to activities where teamwork and communication through visual assets take the central role. These accessories are available in different colours and shapes to provide the training professional with a better way to cluster and structure information.

Active Chair 360+R

Collaborative chair with integrated armrests and storage

Collaborative workspaces have become the latest trend in places such as libraries, educational facilities, and even in companies that are committed to teamwork. With Active360+R chairs, users can quickly and effortlessly change the room's configuration and store backpacks in the base avoiding cluttered aisles. The seat bends and flexes with the user for better ergonomics and comfort, which can be increased by the armrests installed in the Active360+R model. The tablet holder and cupholder are precious add-ons for dynamic learning spaces.

Flex Chair

Colourful, ergonomic and washable

Flex Chair is a piece of school furniture produced in Portugal and comes in a variety of colours. The used material is simply high-density polypropylene (PP). This chair was designed as a single piece (without mounting components), giving it high resistance and durability, as well as flexibility, making it comfortable and ergonomic. The chair is washable and also recyclable.
