

Antimicrobial Cork Board

Antimicrobial cork surface to display information

DESCRIPTION

The Antimicrobial Cork Notice Board has been treated with a special additive that inhibits the growth of microbes. As a result, the potential risk of cross-contamination decreases significantly. It also prevents foul smells, irremovable staining, or premature material degradation. The white lacquered aluminium frame also has antimicrobial properties. It's the perfect fit for areas where cleanliness is essential like healthcare facilities, but also for regular spaces like meeting rooms or classrooms. Pin boards are a great way to keep important information organised and to post reminders. It's a handy way to inform everyone at once, to get creative or set goals.
