

Plugstation

Storage and charging cart to laptops or tablets

DESCRIPTION

With technology and connectivity constantly improving, the educational landscape will continuously be transformed, creating the world of adaptive learning, and becoming a blend of human-to-human and human-to-technology interactions. Therefore, the physical space needs to evolve alongside technological advances and demands for practical charging solutions.

The Plugstation locks up to 36 devices while they charge, offering extra protection. With the help of handle and swivel casters the users can move connected devices from room to room.
