

## Focal Tripod Projection Screen

Portable self-standing projection screen

### DESCRIPTION

Tripod screens are ideal for pop-up presentations and occasional projection needs. This product range comes with a useful tripod base and therefore doesn't require ceiling or wall mounting.

The matt white surface provides a great viewing experience, while the included carrying bag brings to the product easy portability.

### CLEANING AND MAINTENANCE

#### Cleaning and Maintenance

Frequent use of a screen requires appropriate care. All screens can be cleaned with carefully applied weak soapsuds. When not in use, the screens should be retracted to their casing to protect them against depositing dust. Avoid touching the screen fabric with bare hands since, in the course of time, dust will stick better to the (greasy) imprints than on clean spots.

Cleaning in 5 easy steps:

Step 1: Use a new dry microfiber cloth and gently wipe the screen. Do not scrub!

Step 2: Make a mixture of 95% warm water and 5% dish soap.

Step 3: Moisten the microfiber cloth without soaking it.

Step 4: Gently clean the screen using the wet microfiber cloth. Apply light pressure and rub the screen side to side.

Step 5: When it is clean, use a dry cloth or towel on the surface to absorb any remaining moisture.
