

## Antimicrobial Writing Board

The right choice for communication in protected areas

### DESCRIPTION

Keep spaces germ free with **Antimicrobial Writing Board**. The product has been treated with a special additive that inhibits the growth of microbes. As a result, the potential risk of cross-contamination decreases significantly. It also prevents foul smells, irremovable staining, or premature material degradation. The white lacquered aluminium frame also has antimicrobial properties.

It's the perfect fit for areas where cleanliness is essential like healthcare facilities, but also for regular spaces like meeting rooms or classrooms. Writing boards are perfect aids to explain subjects, brainstorm ideas, and be creative. It's a handy way to inform everyone at once, to get creative or set goals.
