

Inkstring XL Drywipe Markers

The natural flow of writing with non-toxic ink

DESCRIPTION

A whiteboard marker with gel ink is the state-of-the-art writing accessory. These new drywipe markers with liquid gel ink for whiteboards provide a unique and smooth writing experience. The gel ink is very easy to wipe off with any drywipe eraser, without leaving any ghosting on any non-porous surfaces, like lacquered steel, vitreous enamel, or glass. After drying, you can even use the finger to erase small parts and it won't get dirty. The **Inkstring XL Drywipe Marker** writes twice the distance of the normal drywipe pens, without any micro-dust and with a very low odour. The tip of the pen has a 3 mm diameter, which is perfect to be used in professional environments such as class and meeting rooms.
